### DETAILED ACTION

1 Applicants amendment dated January 19, 2006 has been received and entered. Claims 1-21 are pending in the application. Applicant attention is directed to the use of the phrase "twisted portion" in the specification and in each of the independent claims 1, 12 and 20 and some of the dependent claims. However, none of the figures teach the claimed invention, as each of the figures provided with the application teach crossover portion(s) and not the twisted portion of the coil(s). Correction, if possible under M.P.E.P. rules is required. For example, a "twisted portion" looks like a twisted wire at the top of a coat hanger.

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Mori (US 5,389,880).

As regards to claim 1 and 20, Mori teaches a coil arrangement and a method for providing coil array for a medical imaging system, including a plurality of coil elements for a medical imaging system (figure 16, several coil elements can be seen in the figure; column 1, lines 1-40); and a plurality of twisted portions in combination with the plurality of coil elements, and wherein a twisted portion is provided generally centered between each adjacent coil elements of the plurality of coil elements (figure 16, coil 88 has many coil elements, where each element has a twisted portion joining its adjacent element).

As regards to claim 12, Mory teaches a coil array and a method for medical imaging system, including a first coil array portion having a plurality of coil elements for a medical imaging system (figures 1, 12; column 1, lines 6-66); and a second coil array portion having a multi-lobe saddle train, the multi-lobe saddle train comprising a plurality of twisted portions and wherein a twisted portion is provided between each adjacent lobe of the multi-lobe saddle train, and the twisted portion located at a distance from each of an edge of adjacent lobes (figures 12-14 and 16).

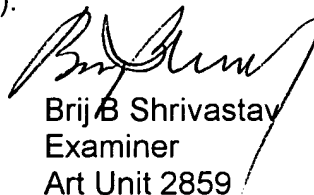

As regards to claims 2-11, 14-19 and 21, Mori further teaches medical imaging system having surface coil loops with twists/crossovers having overlapping and non-overlapping sections with saddle coil element(s) (figures 12-14, 16 and 17; column 1, lines 6-66).
